2007 CBC Section 1507.3, Table 1507.3.7

Revised 10-15-07
Revised 04-21-05
Issued 09-1-99 as IR M-7

Discipline: Structural

This Interpretation of Regulations (IR) is intended for use by the Division of the State Architect (DSA) staff, and as a resource for design professionals, to promote more uniform statewide criteria for plan review and construction inspection of projects within the jurisdiction of DSA, which include State of California public elementary and secondary schools (grades K-12), community colleges, and state-owned or state-leased essential services buildings. This IR indicates an acceptable method for achieving compliance with applicable codes and regulations, although other methods proposed by design professionals may be considered by DSA.

This IR is reviewed on a regular basis and is subject to revision at any time. Please check the DSA web site for currently effective IR's. Only IR's listed in the document at <http://www.dsa.dgs.ca.gov/Pubs/default.htm> (click on "DSA Interpretations of Regulations Manual") at the time of plan submittal to DSA are considered applicable.

Purpose: The purpose of this Interpretation of Regulations (IR) is to provide guidelines for the installation of "S" roof tiles.

Note: This IR is not applicable to roof tiles with an interlocking channel, and it is limited to maximum basic wind speed of 85mph, and maximum mean roof height of 60 feet.

General: Clay or concrete "S" roof tile attachments are acceptable as shown on Figure 1. For additional requirements, refer to 2001 CBC Section 1507.7A and Tables 15-D-1.1 and Tables 15-D-2.1, or 2007 CBC Section 1507.3 and Table 1507.3.7.

Alternatively, clay or concrete "S" roof tile attachments meeting the requirements of IR 15-2 are acceptable.

Inspection: The inspector of record is to provide continuous inspection of the attachment of the roof tile. Application of the roof tile is not to be started until the attachment details have been reviewed and approved by the Division of the State Architect (DSA) field engineer, if the details do not conform to the approved drawings.
